PROFESSIONAL SUMMARY

AI-Driven Software Engineer and Computer Science graduate (VIT-AP University, 2025) with hands-on experience building AI pipelines, real-time full-stack applications, and deep learning systems.

Skilled in designing end-to-end AI workflows, integrating cloud databases (Supabase), and deploying scalable web applications. Strong foundation in Machine Learning, backend engineering, and modern JavaScript ecosystems.

Certified in Azure Fundamentals and AI automation simulations with practical exposure to prompt engineering and AI-assisted debugging.

PROJECT EXPERIENCE

- Smart Bookmark App – Real-Time Bookmark Management Platform: Built production-ready real-time system with Supabase Auth & Realtime DB, structured CRUD backend logic, responsive UI, and live deployment. Tech Stack: JavaScript, Supabase, Node.js, Vercel.
- Product Analyzer – AI Multimodal Classification System: Developed image + text classification system with multimodal architecture, NLP preprocessing, and Flask backend deployment. Tech Stack: Python, PyTorch, OpenCV, NLP, Flask.
- Bone Fracture Detection Using Deep Learning: Built a CNN-based medical image classifier with dataset preprocessing, validation, and prediction interface. Tech Stack: Python, TensorFlow/Keras.
- BrewIt – Progressive Web Application: Implemented service workers for offline support, mobile-first UI, and scalable content structure. Tech Stack: HTML, CSS, JavaScript, Node.js.
- MyDay Organizer – Android Productivity App: Integrated SQLite database, implemented Material Design architecture, and built task scheduling & calendar integration. Tech Stack: Java, Android SDK.

VIRTUAL JOB SIMULATIONS

- Datacom – Partnering with AI in the Workplace (2026): Applied generative AI for research, debugging, and structured reporting.
- Datacom – Automation Job Simulation (2026): Designed client process automation flow and performed requirements analysis.
- Datacom – Automation AI Accelerator (2026): Built AI-driven automation workflows and structured process pipelines.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3, XML

AI / Machine Learning: PyTorch, TensorFlow/Keras, OpenCV, Scikit-learn, NLP Preprocessing

AI Workflows & Pipelines: Prompt Engineering, AI Workflow Design, Model Integration, API Orchestration

Full-Stack Development: Node.js, Flask, REST APIs, Progressive Web Apps (PWA)

Database & Backend Services: Supabase (Auth, Realtime DB, Storage), SQLite

Android Development: Java, Android SDK, Android Studio, RecyclerView

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, IntelliJ IDEA Cloud &

Deployment: Microsoft Azure (Fundamentals), Vercel, GitHub Pages

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- Partnering with AI in the Workplace – Forage (Feb 2026)
- Automation AI Accelerator: From Co-pilot to Autonomous Agent – Datacom (Feb 2026)
- Google AI Essentials - Coursera (Jun 2026)
- Google Prompting Essentials - Coursera (Jun 2026)
- Python - Kaggle
- Google Skillshop Certified Trainer Course

CORE COMPETENCIES

- Full-Stack Development
- AI Pipeline Design
- Supabase Integration (Auth + Realtime DB)
- Deep Learning Model Development
- REST API Development
- Prompt Engineering
- Real-Time Application Architecture
- Problem Solving & Rapid Learning
